## Action Area Countertops

Our countertops are made with Avonite, a durable product that is seamless, easy to clean and resistant to biohazards. We recognize the health risks that the crew and module are susceptible to during patient care and we are focused on using material that helps to alleviate fluid from seeping into the Road Rescue module.

## Composite Interior

Our composite material used to construct the interior cabinets and floor resists fluid borne pathogens and provides over twice the insulation value when compared to wood. It is a non-toxic, synthetic material that can be customized to meet each customer's needs.

Visit our website to find one of our professional dealers and get on your way to owning a MetroMedic by Road Rescue.

Some of the options shown are not standard. Please contact your Road Rescue dealer for more information.

## Formed Seamless Upholstery

Lower band seat, wall, and backrest cushions utilize vacuum formed seamless cushions.
